## Introducing the Russound Collage Powerline Media and Intercom System

### CAK1 Collage Amplified Keypad Part# 2920-531309

The Collage Amplified Keypad (CAK1) features a high-resolution ¼ VGA display for viewing system information and source metadata. The capacitive scroll wheel touch and buttons provide easy, intuitive navigation of sources and network accessible music. An internal FM tuner serves as an additional source in each zone, and built-in microphone allows for zone-to-zone intercom communication and room monitoring. The Keypad also features a system clock with alarm and sleep timer. It delivers 32 watts per zone @ 8 ohms, and is stable to a 4 ohm load. Display screen back-lighting levels are adjustable automatically via a built-in light sensor.

### CMM1 Collage Media Manager Part# 2920-531323

The Collage Media Manager (CMM1) connects to local area network through a router for access to network attached storage devices and the internet. The power cord provides both power to the unit, as well as a connection to Powerline Carrier network, making installation fast and easy. The Media Manager delivers up to three independent streams of digital music from the local area network and online music sources to the Powerline Carrier network.

### Minuteman® Line Interactive Uninterruptible Power Supply

Power protection and management products including Uninterruptible Power Supplies (UPS) for computers, servers, peripherals, voice and data communication systems, security systems and other mission-critical equipment. Shutdown Software is included.

#### ETR700P15

The Entrust ETR700p15 is a 700VA/420W 120 VAC line interactive UPS with 15-foot power cord designed for desktop or floor mounting.  
 Back-up time - full load: 4.0 minutes  
 Back-up time - half load: 10.5 minutes

#### EN750

The EnSpire EN750 is a 750VA/400W 120 VAC stand-by UPS designed for desktop, floor or wallmounting.  
 Back-up time - full load: 4.7 minutes  
 Back-up time - half load: 11.5 minutes

#### E750RM2U

The EnterprisePlus E750RM2U is a 750VA/600W 120 VAC line interactive, extended runtime rack/wall/tower UPS designed for critical, power-sensitive electronic environments.  
 Back-up time - full load: 10.2 minutes  
 Back-up time - half load: 25.6 minutes
