

# Wired Long-Range RF Transmitter

**HL-951T1-SWQ** 917MHz

The ENFORCER HL-Series RF transmitters and receivers offers significantly increased range with greatly increased immunity to interference, whether physical obstacles, temperature extremes, or other environmental factors. The wired transmitter allows you to easily make other devices wireless. This can be very useful anywhere it may be inconvenient to control a device at a distance without wires.

## Features

- Includes one 3VDC lithium battery (CR-2032)
- May also be powered by a 4.5~13 VDC external regulated adapter (not included)
- Operating range up to 1,800ft (550m)\*
- LED transmission and low-battery indicator
- Over  $2.028 \times 10^{31}$  possible codes
- Compact size
- Compatible with all SECO-LARM HL-series receivers of the same frequency
- Also available without logo – HL-951T1-SWUQ

## Specifications

Type	Wired RF transmitter	
Power	Battery	1x 3VDC button battery (CR-2032, included)
	External	4.5~13 VDC regulated adapter (not included)
Wiring	Switch	Two 6" N.O. blue wires
	Power	Two 6" wires (red +, black -)
RF frequency	917MHz†	
Operating range	up to 1,800ft (550m)*	
Buttons (number)	1	
Channels	1	
Dimensions	3 <sup>1</sup> / <sub>16</sub> "x1 <sup>5</sup> / <sub>16</sub> "x1 <sup>1</sup> / <sub>2</sub> " (78x34x13 mm)	

\*Actual range will vary depending on the installation and operating environment.

†868MHz also available with CE certification
